The IMS Bulletin
Vol.20, No.6, 1991, 605–620.

Author Index to Abstracts: Volume 20 (1991)

Abstracts of papers, either presented in person (382) or by title (50), were published in *The IMS Bulletin*, Volume 20 (1991):

Vol.20, No.1, January/February 1991: By Title, pp. 23–25 (91t-1–8)
In Person, page 4: Uppsala, Sweden (216th IMS Meeting)
pp. 55–67: Houston, Texas (217th IMS Meeting)

Vol.20, No.2, March/April 1991: By Title, pp. 126–128 (91t-9–17)
In Person, page 106: Houston, Texas (217th IMS Meeting)
pp. 157–181: Philadelphia, Pennsylvania (218th IMS Meeting)
pp. 192–203: Santa Barbara, California (219th IMS Meeting)

Vol.20, No.3, May/June 1991: By Title, pp. 239–241 (91t-18–26)
In Person, pp. 238–239: Philadelphia, Pennsylvania (218th IMS Meeting)
pp. 260–277: University Park, Pennsylvania (220th IMS Meeting)
pp. 304–342: Atlanta, Georgia (221st IMS Meeting/54th IMS Annual Meeting)

Vol.20, No.4, July/August 1991: By Title, pp. 408–411 (91t-27–41)
In Person, page 411: Atlanta, Georgia (221st IMS Meeting/54th IMS Annual Meeting)

Vol.20, No.6, November/December 1991: By Title, pp. 559–561 (91t-42–50)

Abstracts of papers presented in person are usually numbered according to the IMS meeting number as given above. However for the 221st IMS Meeting (54th IMS Annual Meeting) held in Atlanta, Georgia, 19–22 August 1991, abstract numbers are coded IP- for invited papers (pp. 304–308), and CP- for contributed papers (pp. 309–342).

ADLER, ANDRÉ. The "fair" games problem for multi-dimensional indexed random variables, CP-120 (page 339).
ADLER, ANDRÉ, ANDREW ROSALSKY, and ROBERT L. TAYLOR.
Some strong laws of large numbers for sums of random elements, CP-124 (page 340).
AHSANULLAH, MOHAMMAD. Some characterizations of the normal distribution through chi-squared distribution, 218-20 (page 163).
Some characteristic properties of Gumbel's bivariate exponential distribution, CP-105 (page 335).
AHSANULLAH, MOHAMMAD and BURT HOLLAND. On the use of record values to estimate the location and scale parameters of the generalized extreme value distribution, 218-7 (page 159).
AHSANULLAH, MOHAMMAD *see also* BHOJ, DINESH S.
AKMAN, H. OLCAY and RAMESH C. GUPTA. Statistical inference based on the length-biased data for the inverse Gaussian distribution, CP-99 (pp. 333–334).
AKRITAS, MICHAEL G. *see* ISOBE, TAKASHI.
ALI, M. MASOOM *see* UMBACH, DALE.
ALKHAIRY, ASHRAF and DAVID H. STAELIN.
An efficient method for estimating Taguchi's SNR, 218-67 (page 177).
ALTMAN, NAOMI S. and CHRISTIAN LÉGER. Comparison of cross-validation and the bootstrap for tuning parameter selection, CP-49 (page 321).
ANDERSON, CHARLES L. *see* WALSH, DENNIS P.
ANDERSON, JAMES, LAURENCE FREEDMAN, JANIS P. HARDWICK, and DAVID ZUCKER.
Ethical considerations for clinical trials, 219-38 (page 203).
ANDERSON, PAUL.
Asymptotic results for periodic autoregressive moving average time series, 219-10 (page 194).
APPLEBAUGH, GWENDOLYN NEUL and WILLIAM K. APPLEBAUGH.
Using resistant lines to monitor trends, 218-43 (page 170).

APPLEBAUGH, WILLIAM K. *see* APPLEBAUGH, GWENDOLYN NEUL.
ARAS, GIRISH A. and MICHAEL WOODROOFE. Moments on randomly stopped averages and their applications to sequential estimation, 219-13 (page 195).
ARCONES, MIGUEL and EVARIST GINÉ. The bootstrap of *M*-estimators, IP-16 (pp. 307–308).
ARNOLD, BARRY C. Logistic processes involving Markovian minimization, CP-76 (page 329).
ATHREYA, K. B. On measures of degeneracy, 91t-4 (page 24).
On a maximum sequence in a critical multitype branching process, 91t-5 (page 24).
On measures of degeneracy, CP-132 (page 342).
AVNI, YORAM, D. M. WORRALL, and W. A. MORGAN, JR.
Analysis of astronomical data containing non-detections: Effects of increasing the permissible range of the underlying distribution, 220-1 (page 260).

BABU, GUTTI JOGESH *see* ISOBE, TAKASHI.
BAI, ZHIDONG and YUEHUA WU. Recursive algorithm for m-estimates of regression coefficients and scatter parameters in linear models, CP-40 (page 319).
BAILYN, CHARLES D.
Radially dependent distribution functions in globular clusters, 220-2 (pp. 260–261).
BALDING, D. J. Forensic identification in structured populations, CP-53 (page 322).
BALKEMA, A. A., C. KLÜPPELBERG, and SIDNEY I. RESNICK.
Densities with Gaussian tails, CP-52 (page 322).
BANCROFT, D. R. E. *see* KAHN, W. D.
BANKS, DAVID and TOM KURFESS. Methods for Bayesian metrology, 218-41 (page 169).
BAPAT, R. B. and SUBHASH C. KOCHAR.
A characterization of identically distributed independent random variables, 91t-10 (page 126).
Partial orderings of *k*-out-of-*n* systems of nonidentical components, 91t-42 (page 559).
BARRON, ANDREW R. and ROGER L. BARRON. Artificial neural networks in industry: Some developments using statistical techniques, 218-66 (page 177).
BARRON, ROGER L. *see* BARRON, ANDREW R.
BARROW, JOHN D. Statistical problems in cosmology, 220-3 (page 261).
BASU, ASIT P. and SUNIL K. DHAR.
Discrete multivariate geometric distributions, CP-107 (pp. 335–336).
BASU, ASIT P. *see also* MUKHOPADHYAY, CHIRANJIT.
BASU, SANJIB and ANIRBAN DASGUPTA. On the coverage probability of standard confidence intervals for location parameters under departure from normality, CP-29 (page 316).
BECKERMAN, MARTIN. Sensor data fusion for mobile robots, 218-19 (pp. 162–163).
BEERS, TIMOTHY C. Assessment of subclustering in clusters of galaxies, 220-4 (page 261).
BELIN, THOMAS R. and DONALD B. RUBIN.
Recent developments in calibrating error rates for computer matching, 219-24 (pp. 198–199).
BÉLISLE, CLAUDE J. P., H. EDWIN ROMEIJN, and ROBERT L. SMITH.
Hit-and-run algorithms for generating multivariate distributions, 219-23 (page 198).
BELLHOUSE, DAVID R. The role of roguery in the history of probability, 219-26 (page 199).
BERK, RICHARD A. Using resampling methods as a teaching device, 219-27 (pp. 199–200).
BERTRAND, PHILIP V.
Fitting the proportional hazards model with missing values of covariates, 218-32 (page 167).
BÉRUBÉ, JULIE and GEORGE P. H. STYAN.
Generally decomposable three-way layouts, 219-35 (page 202).
BHANDARI, SUBIR KUMAR *see* BOSE, MAUSUMI.
BHAUMIK, DULAL KUMAR and PANDURANG M. KULKARNI. One-sided tolerance limits for the unbalanced one-way ANOVA random effects model, 217-43 (page 66).
β-content tolerance limits for the unbalanced one-way ANOVA random effects model, CP-93 (page 332).
BHAUMIK, DULAL KUMAR and THOMAS MATHEW. Minimaxity of randomized optimal designs with respect to a general optimality criterion, CP-94 (page 333).
BHOJ, DINESH S. and MOHAMMAD AHSANULLAH. A test of the equality of the coefficients of variation in a bivariate normal distribution, CP-90 (page 332).
BICKEL, PETER J. and YA'ACOV RITOV. A new approach to testing goodness of fit, 217-28 (page 62).
BLAIR, R. CLIFFORD and GEORGIA LEE THOMPSON.
A distribution-free, rank-like test for scale with unequal population locations, 217-11 (page 57).
BOROWIAK, DALE. Ranking and selection in 2 x 2 factorial designs, CP-78 (page 329).
BOSE, ARUP and RATAN DASGUPTA. Speed of convergence of the least squares estimator in autoregressive models, 91t-41 (page 411).

BOSE, ARUP and TAPAS K. CHANDRA. A note on the strong law of large numbers, 91t-49 (page 561).
BOSE, MAUSUMI and SUBIR KUMAR BHANDARI. Selecting the t best cells of a multinomial distribution, 91t-47 (page 560).
BOWMAN, K. O., L. R. SHENTON, and MARVIN A. KASTENBAUM.
Mixtures of logarithmic distributions, 91t-18 (page 239).
Discrete Pearson distributions, 91t-36 (page 410).
BOX, GEORGE and JOSÉ RAMÍREZ. Cumulative score charts, 218-30 (page 167).
BRADLEY, RICHARD C. On the spectral density and asymptotic normality of weakly dependent random fields, 91t-12 (page 127).
Equivalent mixing conditions for random fields, 91t-13 (page 127).
BRONIATOWSKI, MICHEL. On the estimation of the Weibull tail coefficient, 91t-19 (page 239).
BROWN, STEPHEN J. and TOSHIYUKI OTSUKI. A global asset pricing model, 219-6 (page 193).
BRUNELL, ROBERT M. and PAUL WHITNEY.
Consistency of estimators based on sample spacings, CP-126 (pp. 340–341).
BUCCHERI, ROSOLINO.
Search for periodicities in high energy gamma-ray astronomical data, 220-5 (page 261).
BURDZY, KRZYSZTOF and GREGORY F. LAWLER. Geometry of a random fractal, IP-7 (page 305).
